

GreenGrow Farms — Employee Handbook

1. Company Overview

GreenGrow Farms was founded in 2018 in Meknes, Morocco, and specializes in precision agriculture technology for smallholder wheat and olive farmers. The company currently employs 47 people across three offices: Meknes, Casablanca, and a small satellite office in Lyon, France. GreenGrow's flagship product, FieldSense, is a soil-moisture sensor system paired with a mobile app that sends irrigation alerts to farmers in Arabic, French, and English.

2. Working Hours

Standard working hours are Monday through Friday, 9:00 AM to 6:00 PM, with a one-hour lunch break. During the harvest season (June to August), field support staff switch to a 7:00 AM to 3:00 PM schedule to align with farmer activity. Remote work is permitted up to two days per week for office-based roles, subject to manager approval.

3. Vacation Policy

Full-time employees accrue 22 paid vacation days per year, plus all official Moroccan public holidays. Employees become eligible to use accrued vacation after completing a 90-day probationary period. Unused vacation days may be carried over into the next year, up to a maximum of 5 days.

4. Equipment and Expenses

New employees receive a laptop and a FieldSense demo kit within their first week. Field staff are reimbursed for fuel and vehicle maintenance up to 1,200 MAD per month, submitted via monthly expense reports to the Finance team. Reimbursement requests must be submitted within 30 days of the expense date or they will not be honored.

5. Performance Reviews

Performance reviews are conducted twice a year, in January and July. Reviews are based on three criteria: goal completion, peer feedback, and customer impact (measured via farmer satisfaction surveys for field-facing roles). Salary adjustments, when applicable, are announced following the July review and take effect the following month.
